

Cardiac Surgery consultant: Riyadh, KSA

Job Information

Enjoying the strategic location in the heart of Riyadh City, our client hospital is considered the largest and most advanced medical complex in the Middle East with a total capacity of 1095 beds. The Complex is situated in the Sulemanian area of Riyadh and consists of 4 hospitals and Primary Care Clinics that also serve as an Outpatient Unit for the purpose of screening patients (X-ray Rooms, Pharmacies and Laboratories). The Main Hospital is a 459-bed hospital with specialty clinics for diagnosing and treating various diseases. Rehabilitation Hospital is a 159-bed hospital offering different levels of care, including inpatient, day rehabilitation, and outpatients' services, Children's Hospital is a 246-bed facility and the Maternity Hospital has 236 beds. In addition to the hospitals, the Medical Center has 30 fully equipped operating rooms and contains the largest number of Intensive Care beds in the Region. They are staffed with visionary management and highly qualified professionals sharing a common goal in becoming a tertiary care referral center throughout the Region and to become a bridge between the East and West for information channeling.

The Position:

Heart surgeons are physicians who choose to focus their surgical practice on the heart and blood vessels of the chest cavity. Becoming a heart surgeon requires extensive education and training, including an undergraduate degree, medical school, residency and internship.

Heart surgeons have been trained to perform surgery on the heart, lungs, esophagus, blood vessels and other organs in the thoracic cavity. These medical professionals conduct tests on patients to determine whether they have any conditions within the heart or vessels that need treatment. In addition to performing complicated surgeries, heart surgeons must conduct follow-up visits with patients and help them manage their overall health.

Your Profile:

You are an MD, After graduating, all aspiring surgeons must complete a 5-year general surgery residency. Residents learn how to perform all different types of surgery during their training. After completing a general surgery residency, those who wish to become heart surgeons need to complete an additional 2- or 3-year internship in cardiothoracic surgery. Interns focus on their chosen specialty and increase their knowledge and technical skills in the area of thoracic surgery. Once this internship is completed, surgeons may sit for A Board of Thoracic Surgery examination to become board certified

. You hold a specialist diploma in your field of expertise after having received training in a respected European, North American or Middle East University. Board Certification from the American, European or Arabic Board or equivalent (Royal College) is mandatory.

- After graduation you have acquired at least 5 years of practical experience. You can rely on a vast number of on-the-job experiences in which you have been working with a wide variety of patients who had differing symptoms and conditions.
- You understand and are able to speak both English and Arabic fluently
- You have always kept up with new studies, findings, and trends by attending workshops or seminars additional to licensing requirements.
- Besides your technical competencies you also have leadership qualities. You like to share knowledge and experience, stimulate cooperation and adapt easily to a new environment.

Offer:

- All new staff will be given full orientation to the hospital.
- 24 month contracts (renewable)
- Tax Free Salary (+ benefits), so you will be able to save the majority of your salary
- Incentive scheme
- Free Medical Coverage for self and family
- Single/Family contract
- Housing Accommodation
- 30 days of Annual Leave per year plus 4 days paid leave for attending CMEs/ Conference
- Annual vacation air tickets to point of origin (on contract renewal)
- Recreation Services
- Availability of on Job training & courses
- Licensing process can take from 4 – 6Months
